PROFESSIONAL SUMMARY

Dynamic Frontend Engineer with 6+ years of experience building scalable, high-performance web applications using React, Next.js, TypeScript, and Angular. Proven expertise in optimizing UI/UX, improving page load times by up to 40%, and increasing code quality for fintech and enterprise solutions. Passionate about delivering exceptional user experiences in agile environments, with ongoing upskilling in modern frontend frameworks.

PROFESSIONAL EXPERIENCE

Uridium Works Limited
Frontend Engineer
March 2023 – Present | Lagos, Nigeria

- Designed and developed scalable, high-performance frontend applications using React, Next.js, Angular, and TypeScript that powered enterprise and digital transformation projects across the Uridium Group.
- Built and delivered OmniX, a robust platform that improved operational efficiency and user experience for internal and client-facing workflows.
- Developed the Coronation Ecosystem Financial Reporting Dashboard, enabling real-time financial insights and significantly reducing the time required for reporting and decision-making.
- Collaborated closely with product, design, and backend teams to ship clean, responsive, and maintainable interfaces that improved usability and performance in real-world conditions.
- Applied modern frontend best practices (component architecture, advanced state management, performance optimisation, and responsive design), resulting in faster load times and more reliable experiences across devices and varying network conditions.
- Contributed to high-impact solutions in finance, enterprise systems, and digital transformation, with a strong focus on solving complex business challenges in the African market.
- Directed frontend architecture for a core banking application, ensuring high code quality and successful on-time, under-budget delivery. Mentored 3 junior developers

through code reviews, pair programming, and workshops, increasing overall team productivity by 25%.

Uridium Technologies Limited
Frontend Developer
March 2022 – March 2023 | Lagos, Nigeria

- Built interactive dashboards and admin panels using React.js and Chart.js for real-time data visualisation in enterprise tools.
- Developed MR3 Patient, a secure digital health records platform that allows individuals and families to manage medical history, share records with healthcare providers, and access care more efficiently. Built the frontend of USmartInvoice, a web application that simplifies invoice generation and payments for African businesses using React.js, Tailwind CSS, and Redux Toolkit. Integrated REST APIs and managed complex application state with Redux, enabling dynamic data flows across 15+ client projects.
- Created reusable component libraries that standardised UI across teams and reduced development time by 20%.
- Wrote unit and integration tests with Jest, increasing code coverage to 85% and minimising production issues.
- Actively contributed to daily stand-ups and sprint planning in an Agile environment, consistently delivering features ahead of schedule.

Freelance Frontend Developer
December 2019 – August 2024 | Nigeria (Remote)

- Designed and developed scalable, high-performance frontend applications using React, Next.js, and TypeScript for multiple independent projects across education, health, and business domains.
- Built and launched Beam Connect, an all-in-one Learning Management System tailored for Nigerian course creators, integrating live classes, student management, local Naira payments, progress tracking, and automated certificates into a single platform.
- Developed clean, responsive, and maintainable user interfaces that delivered excellent performance even in low-bandwidth environments, significantly improving usability for end users. Applied modern frontend best practices including component architecture, advanced state management, code splitting, and performance optimisation to ensure fast load times and reliable experiences.
- Collaborated directly with clients and stakeholders to turn product ideas into production-ready applications, consistently delivering solutions that solved real local market challenges. Created reusable component systems and well-structured codebases that improved development speed and long-term maintainability across projects.

EDUCATION

Bachelor of Science in Computer Science
Federal University of Technology, Owerri
November 2014 – December 2019

SKILLS

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Angular, Redux, Jest, Jasmine, Git, GitHub, GitLab, REST APIs, Chart.js, Web Performance Optimization, Cross-Browser Compatibility, WCAG Accessibility, Agile Methodologies, Debugging

CERTIFICATIONS

- Computer Professionals Council of Nigeria (CPN), 2019
